Hussein Kizza (Kizz)

Senior Frontend Developer

Other Valuable Skills: UI & UX Design, Company Branding
& Graphics Design, Digital Marketing, Startups & Customer Handling.

Breif Summary:

I am a self taught web developer and I build web apps for small businesses and medium sized companies on contract, as a freelancer (part time) or otherwards fulltime and am currently very available for roles as a frontend developer whether remote, office based or relocation. And on projects I use what is most suited to the task however my skills range from the following;

- * JavaScript ES7+,
 - * HTML 5 & CSS 4,
 - * React Js & Next Js,
 - * Sass & Gulp,
 - * Tailwind CSS & Material UI,
 - * Adobe Illustrator & Adobe XD & Figma,
 - * Git & Github,
 - * Restful API & Mock APIs,
 - * SEO & E-commerce,
- Rensponsive Web And a lot more!!!

Relevant Experience:

Frontend Developer - Doctor's Arch Org, Oct 2020 - Jul 2021

* Built the system's frontend from scratch using SCSS and plain HTML.

* Rebuilt the very web app using class-component-based React and Tailwind to allow more flexibility, functionality, and maintainance as the modular components were easier for the team to maintain than a huge verbose markup of HTML. And Tailwind CSS also helped us solve the CSS class naming convention issues yet also giving us uniqueness through it's utilities and thus I choose it then.

* Then updated the whole codebase of our web app to functional component based React or functional React because hooks were much easier than classes, (No more bind this stuff) and this version of the framework had new features and improvements plus more modularity which were so much of a big plus to the team sure!

* Visualized live data in charts and graphs and tables or other forms of data presentation as it was collected by the team in the field and entered into our databases. This was done by connecting our frontend to the backend and database through an API, using a hybrid architecture henceforth. This is one of the best learning experience in my career so far and I believe I worked with one of the best teams around the world despite that we mostly operated in remote setting.

Check out my other experiences on my linkedin profile, the link is right at the top of my CV, thank you!

Formal Education:

Uganda Certificate Of Education - Friends Academy Katende, 2018 - 2019
